# Construction Industry Workers Added to Phase 2 Priority List for COVID-19 Vaccine

The Government of Ontario has added construction industry workers to their phase 2 priority list for COVID-19 Vaccines. This means that construction workers will have access to COVID19 vaccines, once they are available, in a prioritized fashion (a month earlier estimated) than the general public.

In Phase 2, vaccines will initially be made available to population groups based primarily on age and risk, including adults aged 60-79 years of age and groups recognized to have greater risk associated with hot spot communities, including essential workers who cannot work from home. More detail on the government's vaccine rollout plan can be found in the attached PowerPoint presentation.

If you have any questions about operating during the current lockdown, please contact Patrick McManus ([patrick.mcmanus@oswca.org](mailto:patrick.mcmanus@oswca.org) or 905-629-7766).
