New Manager of Government Relations and Public Affairs at OSWCA

This week, GTSWCA welcomes Steven Crombie to its staff as the new Manager of Government Relations and Public Affairs. He will work to elevate the profile of the Association and advance its objectives to all levels of government on issues such as: long-term infrastructure funding; community benefit agreements; late locates; excess soils management roll-out; and occupational health and safety issues impacting the industry. Steven will also be working to improve how the Association communicates with members, particularly through social media.

Steven was most recently employed with the Ontario Waste Management Association, where his work focussed on municipal issues, including excess soils management. He also successfully advocated to include front-line waste workers in Phase 2 of Ontario's priority vaccination sequence. Steven has previous experience working both at Toronto City Hall and Queen's Park.

Steven joins the Association at a critical time, as we grapple with important infrastructure funding and environmental issues. He will be working alongside Krishna Ruchlewicz, Manager of Policy and Strategic Initiatives, to establish strong, policy-backed positions that will help to push member issues forward at all levels of government.

We want to welcome Steven and are excited for what he brings to the Association. If you have any questions, or would like to speak to him directly, his contact details are:

Steven Crombie
Manager, Government Relations and Public Affairs
