# New Enbridge Third Party Requirements Guide for Excavators

Enbridge has recently published a new standard for third-party operators working in the vicinity of its infrastructure: [Third Party Requirements in the Vicinity of Natural Gas Facilities Standard](#). The standard provides details on all of the requirements to be followed and specifies the technical requirements aimed at protection its Gas Distribution and Storage network.

All work in the vicinity of gas facilities is required to adhere to the requirements set out in the standard. It is considered to act in unison with the regulations and legislation governing excavation construction work.

If you have any questions about the this new standard, please contact Patrick McManus ([patrick.mcmanus@oswca.org](mailto:patrick.mcmanus@oswca.org) or 905-629-7766).
